PRODUCT CATALOGUE

Mission

Our mission spells our ambition to have every user of our line of products in the world to hold our tool and say I ENJOY MILES TOOL. We want to see end users satisfied for the money that they pay and the quality that they get, as it is an automatic WIN-WIN for MILES, for all its chain partners and most importantly the end users.

About Us

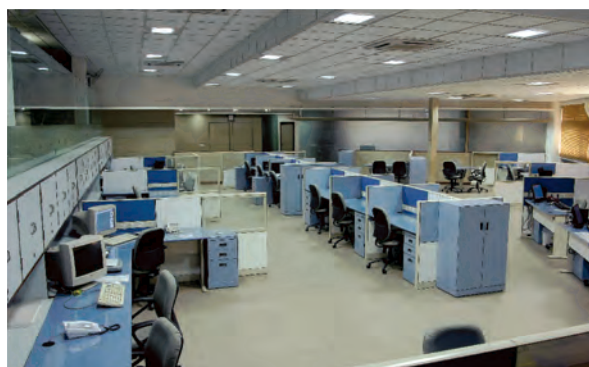

TRADITION : More than 50 years of manufacturing experience
Constantly maintaining and enhancing the quality with perseverance

RELIABILITY : Satisfied customers world-wide
The people we work with are our asset and pride

QUALITY, STYLE & CONFIDENCE : Tools that create new benchmarks and new styles
We are confident and ready to walk the new innovative MILES

A Tool for every hand

Supported by a strong work force of extremely reliable frontline workers who are ably guided by technocrats from specialized Engineering domains, MILES is ready to take on the world and to create that extra ergonomical comfort to nurture and maintain the decades old relationship that we have with end consumers in India and world-wide. The innovative in-house Research & Development teams are on a constant look out to provide something that is new and unique to the end users and are committed to maintain the Niche

that ensures to keep the distributors and other chain partners at a higher level of confidence when they are out to reach new as well as existing business establishments.

Infrastructure

Our manufacturing facility houses a comprehensive sheet metal components manufacturing shop, a machine shop having a range of special purpose machines, fully automatic electroplating plant, fully automatic powder coating plant, plastic injection moulding shop besides all other required facilities in-house. We have fully automatic wire drawing lines to

manufacture desired quality of wire used to manufacture staples on completely automatic staple manufacturing lines. All units are vertically integrated, wherein all manufacturing operations are performed in-house, right from manufacturing of smallest part, spring, rivet etc. to complex multi-part components. This helps to maintain required and desired quality consistently.

R&D Section & Tool Room

Facility has a well equipped Research and Development Centre and an ultra modern Tool Room having all latest facilities CAD/ CAM using the latest software, CNC wire cuts, CNC EDM machines, CNC Milling Machines besides other latest machinery and equipment required to develop quality Tools, Jigs and Fixtures which enable the setup to manufacture the required international quality of its end products.

Market Presence

We are the largest manufacturer & exporter not only in India but in entire South-East Asia and export goods to more than 100 countries that covers Middle East, Africa, South Asia, Far East, United States, Central and Southern America, South Africa, Europe etc. and are now expanding our international portfolio under MILES brand.

We started making Staple Guns only 10 years back but the product quality has had a wonderful reception and has been appreciated by the world's top distributors. USA at present is one of the major markets. The confidence of these few years has enabled us to develop a complete range of products.

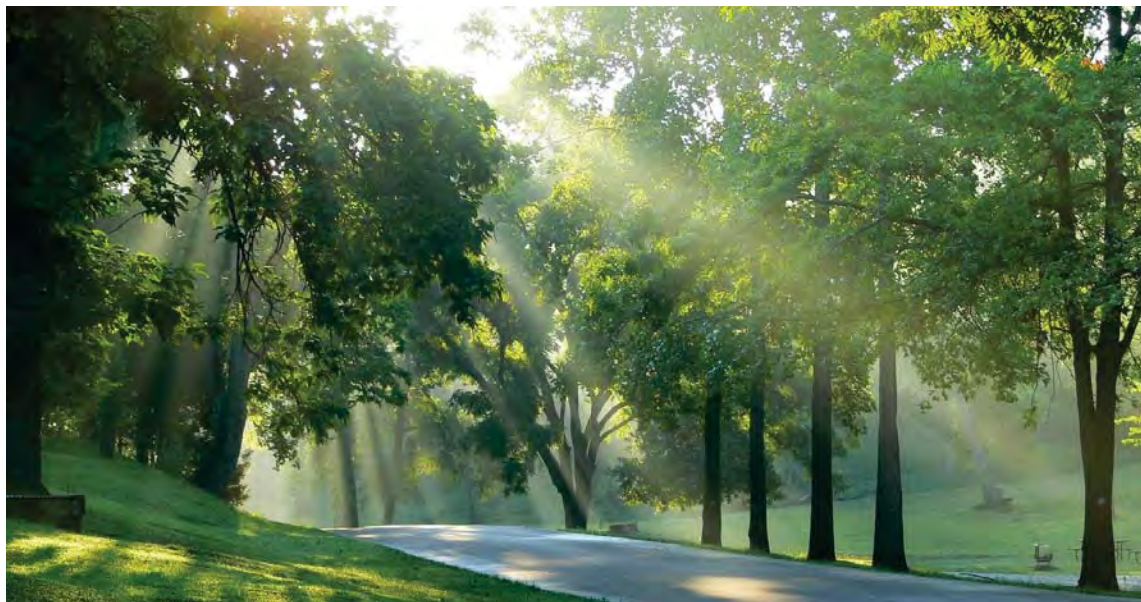

We take this opportunity to present complete range of our products under MILES with detailed specifications.

Quality Policy

'Quality Culture' runs into every segment of Factory's working supported by a team of more than 3000 highly qualified professionals, engineers, technocrats and dedicated workers, whose devotion and dedication have become milestones of MILE's success. "Company believes that quality is the life line of every business and is committed to satisfy its customers by manufacturing and supplying its products to their entire satisfaction first time and every time with continual up gradation in the effectiveness of the quality management system."

Environmental Policy

As one of the leading manufacturers and suppliers, we recognize our responsibility towards environment and are committed for improvement of our environment performance by using energy from renewable sources such as Solar Energy.

HOW TO SELECT CORRECT LEG LENGTH

The leg length of staples should be chosen such that the leg is 2½ times longer than material (M) being used.

M = Material

L = Leg length of staples
